

**Nano Resin Tadbir Asia Co.**

Date : .....

No. : .....

## Quality Certificate

*Reduce your casting costs and improve your casting productivity and quality.*

NRTA RESIN COATED SAND	BENEFITS
1. NRTA RESIN COATED SAND with resistance to metal Penetration and core cracking .	Reduced gas related defects . Elimination of fusion / metal penetration .
2. NRTA RESIN COATED SAND with high cold transverse strength .	Reduced core / mould dilation . Resistance to bending / cracking
3. NRTA RESIN COATED SAND with high permeability .	Faster rates of gas evolution . Lesser gas related defects .
4. NRTA RESIN COATED SAND with specific grain size / shape and size distribution .	Better grain packing for superior surface finish .
5. NRTA RESIN COATED SAND with better collapsibility .	Quicker Knock out of cores during decoring .
